## FCC Information

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

In accordance with FCC requirements, changes or modifications not expressly approved by Thomson Inc. could void the user's authority to operate this product.

This device generates and uses radio frequency (RF) energy, and if not installed and used properly, this equipment may cause interference to radio and television reception.

If this equipment does cause interference to radio or television reception (which you can determine by unplugging the unit), try to correct the interference by one or more of the following measures:

- Re-orient the receiving antenna (that is, the antenna for the radio or television that is "receiving" the interference).
- Move the unit away from the equipment that is receiving interference.
- Plug the unit into a different wall outlet so that the unit and the equipment receiving interference are on different branch circuits.

If these measures do not eliminate the interference, please consult your dealer or an experienced radio/television technician for additional suggestions. Also, the Federal Communications Commission has prepared a helpful booklet, "How To

Identify and Resolve Radio TV Interference Problems." This booklet is available from the U.S. Government Printing Office, Washington, DC 20402. Please specify stock number 004-000-00345-4 when ordering copies.

# Setting the time

EN

## Year/Date/12/24/Time Setting

With this function, you can always read on the display the recording date and time of your recorded messages. Follow the steps below for time setting.

You can still use this unit for normal recording without setting the time. However, no correct recording date and time can be referred for your recorded messages and the display will keep flashing when the unit is turned off.

1. Turn on the unit.
2. Press **MENU** repeatedly to enter Time setting mode.
3. When "2003" flashes, press **REVERSE** or **FORWARD** to change the year, press **MENU** to confirm.
4. Once the year is entered, the digits in the month field will blink (default is 01). Press **REVERSE** or **FORWARD** to increase/decrease the number, press **MENU** to confirm.

5. Once the month is entered, the digits in the day will blink (while the digits in the month field stop blinking). Press **REVERSE** or **FORWARD** to increase/decrease the number, press **MENU** to confirm.
6. Once the date is entered, you can choose between 12/24 hour clock display by pressing **REVERSE** / **FORWARD**, then press **MENU** to confirm.
7. Once the time is entered, the digits in the hour field will blink (default setting is 12 (12 hour mode) & 0 (24 hour mode). Press **REVERSE** or **FORWARD** to increase/decrease the number, press **MENU** to confirm.

### Tip:

Press **STOP** to exit to Stop mode.

2. Press **RECORD** to start recording.  
(recording time will be displayed once you press **RECORD**)
3. To pause recording, you can press **RECORD** once, press again to resume recording.
4. To stop recording, press **STOP**.

### Tip:

To view the remaining time and other recording information, you may press **PLAY** during recording.

## Normal Playback

1. In Stop mode, select a folder (A/B).
2. Select file by pressing **REVERSE** or **FORWARD**.
3. Press **PLAY** to start playback.
4. Press **PLAY** to pause playback, press again to resume.
5. You can press **VOL UP (+)** or **VOL DOWN (-)** to adjust the volume.
6. Press and hold **REVERSE** or **FORWARD** to make quick search within a file.
7. Press **REVERSE** or **FORWARD** once to skip one file forward or backward.
8. Press **STOP** to stop playback.

## Folder selection

You can select a specific folder (A/B) for recording. Default is folder A. Refer to p.11 for details.

## Recording quality (LP/SP/HQ)

You can select between three recording qualities. Default is SP. (Refer to Recording quality / condition section for details.)

## Recording condition (DICT/CONF)

You can select between two recording conditions. Default is DICT. (Refer to Recording quality / condition section for details.)

## Playback mode

You can select to play one file at a time (Play one) or play all files in the folder continuously (Play all). Default is Play one.

You can quickly scan the beginning 3 seconds of each file in a folder. Refer to p.11 for details.

# Recording mode

EN

## Setting Recording Mode

You can select between two recording modes - manual recording and AVR (automatic voice recording).

### 1. Manual Recording

Please refer to page 8.

### 2. AVR (Automatic Voice Recording)

This feature allows the unit to sense sound and to record only when you are speaking into the microphone. When dictation stops for about 3 seconds, recording will stop and then start again automatically when you resume dictation.

1. Select a folder (A/B).
2. Press **MENU** until AVR shows on display.
3. Press **REVERSE** or **FORWARD** to toggle between AVR on and AVR off.
4. Press **STOP** to exit to STOP mode.
5. Press **RECORD** to enter AVR mode.

6. Start dictation. Recording starts automatically.

7. During recording, adjust the sensitivity of the microphone by pressing **VOL UP** and **VOL DOWN**, SEN with sensitivity value shows on display (e.g. increase sensitivity value when recording source is far from the unit or the recording environment is quiet).

8. Press **STOP** to end AVR recording.

9. Repeat step 2 and select AVR OFF for de-selection.

#### Tip:

The first syllable or two may be lost when you start recording because this 'sound' is used to turn on the AVR feature. It is a good practice to make some 'sounds' or say a short word to activate the AVR before you begin actual dictation.
